# E-POWERPAIN

## TWO HEARTS BEATING IN SYNERGY.

The two beating hearts of the Urus SE are the iconic twin-turbo 4.0 V8 engine and a 25.9 kWh high-voltage battery that work in perfect synergy to deliver unparalleled performance and unique driving emotions. The permanent-magnet synchronous electric motor acts as a traction element and as a boost for the V8 combustion engine – the result is an exceptional vehicle able to travel more than 60 km in Full EV Driving Mode. The system power is a stunning 800 PS, with an acceleration of 3.4 seconds from 0 to 100 km/h and a top speed of 312 km/h.

**This revolutionary ICE + Electric combination sets a new standard for the entire segment, rewriting the rules of the hybrid game.**

# NEW TIRES LINEUP

## ENHANCED DRIVING EXPERIENCE.

The Urus SE is equipped with a tire lineup that responds to all possible needs and driving conditions. The Standard configuration comes with Pirelli P Zero tires, which deliver enhanced driving precision. For peak performance during hard handling sessions and outstanding stability during high-speed driving, customers can select the Optional configuration with exclusive Bridgestone Potenza Sport tires.
